

**Kyanize Floor Enamel is Easy to Apply**  
Ease of application is a characteristic of this enamel. It flows very freely under the brush and levels itself to a smooth, even surface.

**Kyanize Floor Enamel Dries Quickly**  
As a rule, with proper ventilation, the floor may be coated one day and used the next.

**Kyanize Floor Enamel is Sanitary**  
A floor coated with this enamel may be washed with cold or warm water. Soaps or soap powders of a strongly alkaline character should not be used on any floor coating at any time.

As in the case of our other high-grade Kyanize products, this enamel is the result of far-reaching research and experiment. Its durability and toughness are so great that it will give prolonged satisfaction on outside porch and piazza floors and steps, on boat decks and on stone and cement surfaces.

**Kyanize Floor Enamel on Porch Floors**  
To insure satisfaction, great care must be used to have the surface clean, free from grease and *absolutely dry*. Then apply Kyanize Floor Enamel as on inside floors.

*Waterproof  
Ammonia-Proof*

*For Cement  
or Wood Floors*

### **Kyanize Floor Enamel on Cement**

To prevent the dusting common to concrete, stone or cement floors or walls, a coat or two of Kyanize Floor Enamel is very effective and satisfactory. Be sure that all dirt and grease are removed and the surface well dusted off, then apply Kyanize Floor Enamel as it comes in the can. Two coats preferred.

In a word, Kyanize Floor Enamel is a very unusual and exceptional product, and is guaranteed to give absolute satisfaction when used as directed.

A NEW and *different* coating for old floors that is washable, sanitary and exceedingly tough and durable. In reality, a high grade solid color enamel that will not crack, peel or chip. Exceptionally elastic and free from the objectionable features so prevalent in ordinary floor paints.

One gallon, under average conditions, will cover approximately 700 square feet of surface one coat.

*Kyanize*

*Sanitary*

FLOOR ENAMEL

MADE under the *Kyanize* process, this enamel dries from the bottom up, thus providing a coating that when dry on top is dry clear through.

*Kyanize Sanitary Floor Enamel*, in addition to old floors, is suitable for shelving and standing finish, also for outside porch and piazza floors, door steps and decks. It gives absolute satisfaction as well on stong, cement or concrete floors and walls.

Nine solid color shades comprise the colors.
